EDUCATION

Dhole Patil College of Engineering

Bachelor of Engineering in Information Technology

Relevant Coursework: Data Science & Analytics, Database Systems, Machine Learning, Statistical Modeling, Data Structures & Algorithms

Pune, India

Aug 2022 – June 2026

TECHNICAL SKILLS

- **Languages:** Python, SQL (MySQL), DAX
- **Data Engineering & Analytics:** Power BI (Power Query), Tableau, Excel, Data Modeling (Star/Snowflake Schema)
- **Cloud & Tools:** AWS (S3, EC2), Agile Methodologies, Git/GitHub, Predictive Analytics, EDA
- **Performance:** Scalability, Data Integrity, Optimization, Pipeline Automation, Performance Tuning

PROFESSIONAL EXPERIENCE

Ventur

Data Analyst Intern

Pune, India

Oct 2025 – Apr 2026

- Engineered optimized **SQL** workflows using CTEs and window functions, improving query performance by 25% and ensuring data integrity across large-scale datasets.
- Developed scalable **Power BI** and **Tableau** dashboards using robust star schema modeling, reducing enterprise data loading latency by 30%.
- Conducted advanced **Exploratory Data Analysis (EDA)** and predictive modeling in Python, providing actionable insights that influenced executive-level business decisions.
- Implemented automated reporting pipelines, increasing operational efficiency and reducing manual data preparation cycles by 40%.
- Collaborated with cross-functional teams in an **Agile** environment to translate complex business requirements into technical performance metrics.

PROJECTS

Netflix Content & Engagement Analytics

[\[GitHub\]](#)

- Designed an interactive BI dashboard optimizing content distribution insights; achieved 30% reduction in insight discovery time via efficient data modeling.
- Automated raw data cleansing pipelines using Power Query to handle high-cardinality media datasets, ensuring consistent data quality.

VeriTrust-AI: Misinformation Detection

[\[GitHub\]](#)

- Architected a distributed machine learning pipeline for fake news detection; achieved 92% accuracy through hyperparameter optimization and feature engineering.
- Evaluated model performance using rigorous statistical validation, confusion matrices, and cross-validation techniques.

Vehicle Order Sales Intelligence

[\[GitHub\]](#)

- Modeled automotive supply chain lifecycles in Power BI using time-intelligence DAX to surface logistics bottlenecks, mapping to 14% efficiency gains.

CERTIFICATIONS

- [Data Analysis](#) (Microsoft & LinkedIn Learning)
- [Data Analytics in Excel](#) (Coding Ninjas)
- [Agile Analysis](#) (LinkedIn Learning)
